

# Seeking Women Recovered from Anorexia or Bulimia Nervosa!

UCSD Eating Disorders Treatment and Research Program is conducting a Neuroimaging research study on those recovered from Anorexia or Bulimia Nervosa. This research study will help us examine the neurobiology of Eating Disorders.

We are seeking those recovered from Anorexia or Bulimia Nervosa:

- Between ages 18 & 45
- With normal height and weight
- No serious medical problems
- No current Medications

You will receive  
up to \$1200 for  
completing brain  
imaging scans and  
all assessments

For more  
information, contact  
recruitment at  
(858)534-8019 or
